Professional Summary

Full-stack software engineer with 9+ years of experience building scalable web applications and leading development teams. Expertise in React, TypeScript, Java Spring Boot, and modern DevOps practices. Has worked onsite across Singapore and Indonesia in enterprise banking, capital markets, and product environments.

Key Expertise:

- Experience in developing scalable web applications using Java Spring Boot, Node.js, TypeScript, and React/Next.js.
- Strong background in microservices architecture, event-driven messaging (Kafka, IBM MQ), and enterprise banking systems.
- Experience in legacy system migration, batch processing, deployment lifecycle, and high-availability system design.
- UI development using React, TypeScript, and modern frontend frameworks.
- Hands-on DevOps practices including CI/CD, Docker, and AWS deployment.

Professional Experience

IBM Singapore (Onsite)

Software Engineer Consultant (Contract) *Jan 2026 – Present*

- **CBGT - Digital Team (Jan – May 2026):** Engaged as consultant for a banking client, leading migration of a legacy enterprise integration layer to Java Spring Boot microservices
- Leveraged agentic AI tooling to accelerate legacy-to-Spring Boot conversion, translating integration flows into hexagonal (ports and adapters) architecture
- Implemented batch processing and scheduled workflows using Spring Batch and Spring Scheduler, with clean separation of domain logic from infrastructure
- **GFMT - Post Trading Team (May – Sep 2026):** Developed post-trade processing services for an institutional equities program using Spring Boot and Spring Modulith
- Built reference data pipelines with hash-based change detection, automated CSV generation, and SFTP delivery
- Implemented messaging and event-driven integration with Kafka and IBM MQ, plus clustered job scheduling with Quartz
- Optimized MariaDB performance on large partitioned tables, including complex multi-table queries
- Contributed to CI/CD pipelines with Jenkins and Drone for deployments on Red Hat OpenShift

DBS Bank Jakarta, Indonesia

Senior Associate, Microservices Engineer (CBGT - Investment Domain) *Feb 2025 – Dec 2025*

- **Wealth & Investment:** Led 16 wealth microservices through a multi-cluster platform migration, covering batch processing, internal platform integrations, database, scheduling, and Kafka-based event streaming
- Managed end-to-end deployment lifecycle across UAT and production environments, ensuring high availability and scalability
- Architected and implemented security solutions including penetration testing frameworks, improving application security posture
- Maintained 80%+ code coverage standards through comprehensive unit and integration testing strategies

Associate, Backend Engineer (CBGT - Kony Platform Core Team) *Nov 2023 – Feb 2025*

- **Omnichannel Banking Platform:** Upgraded the platform's application server stack (JBoss), designed remediation for recurring security assessments, and supported multi-squad UAT delivery across platform migrations
- Core team member for enterprise omnichannel platform supporting Payment, Onboarding, Card and Loan, Security, Deposit, and Investment domains
- Achieved and maintained 80%+ functional and branch coverage, ensuring high code quality and platform reliability
- Coordinated UAT support for 8 Indonesian development squads, ensuring quality deliverables and production readiness

Associate, Frontend Engineer *May 2022 – Nov 2023*

- **CBGT - Internet Banking Web:** Served as React JS Lead for Indonesia, delivering Credit Card Onboarding and Unsecured Lending modules with scalable and modular frontend architecture

- Architected React micro-frontend architecture for internet banking platform serving 1M+ active users across Indonesia
- Collaborated with cross-regional teams (India, Singapore) on Loan, Credit Card, and Investment modules
- Led team of 5 developers in feature development, conducting code reviews and providing technical guidance
- Conducted technical interviews for frontend developer positions across Indonesia and India regions

NTT Data Jakarta, Indonesia
Associate Software Engineer, Frontend (Contract) *May 2022 – Dec 2022*

- Contracted to DBS Bank as frontend developer, demonstrating strong performance that led to direct hire conversion
- Contributed to internet banking platform development using React.js and modern frontend technologies

Garar ID (Founder) Batam, Indonesia
Full-Stack Developer & Technical Lead *Nov 2021 – Present*

- Founded and developed e-commerce platform managing 200+ digital products (game vouchers, utilities, mobile credits)
- Architected full-stack solution using Express.js, MongoDB, Next.js PWA, and React Native mobile application
- Integrated multiple payment gateway APIs to handle secure transaction processing
- Implemented CI/CD pipeline using GitHub Actions, deployed on AWS EC2 with S3 for static assets
- Optimized user experience across web (PWA) and mobile (Android) platforms, ensuring responsive design

BusinessTakeover Singapore (Remote)
Frontend Developer (Freelance) *Jan 2021 – Dec 2022*

- Led frontend revamp project using modern tech stack: Next.js, GraphQL, React Query, Chakra UI, and KeystoneJS
- Implemented server-side rendering (SSR) with Next.js, improving SEO performance and page load times
- Utilized GraphQL and React Query for efficient data fetching and state management, reducing API calls by 40%

ProSpace Singapore (Remote)
Frontend Developer *Mar 2019 – Oct 2021*

- Developed workspace analytics platform and smart workspace product using React.js as core frontend framework
- Built ProSpace Chrome extension with seamless Google Calendar integration for instant schedule viewing
- Created interactive data visualizations and charts using D3.js library for analytics dashboard
- Collaborated with backend team to integrate RESTful APIs and optimize application performance

Rushowl Singapore (Remote)
Frontend Developer *Sep 2017 – Mar 2019*

- Rapidly mastered JavaScript and React Native from scratch, delivering production-ready features within first 6 months
- Built MVP transportation application using React Native for Singapore market, handling real-time location tracking
- Collaborated with cross-functional team to define product requirements and implement user-centric features

Technical Skills

Languages: JavaScript, TypeScript, Java, SQL, HTML/CSS

Frontend: React.js, Next.js, Vue.js, Angular, React Native, Redux, React Query, Chakra UI, Tailwind CSS

Backend: Spring Boot, Spring Batch, Spring Modulith, Quartz, Node.js, Express.js, NestJS, GraphQL, RESTful APIs

Messaging & Integration: Kafka, IBM MQ, TIBCO BusinessWorks, SFTP

Databases: MariaDB, PostgreSQL, MySQL, MongoDB

DevOps & Tools: Git, GitHub Actions, Jenkins, Drone, Docker, Red Hat OpenShift, AWS (EC2, S3), Digital Ocean, CI/CD

Testing: Jest, Unit Testing, Integration Testing, Security Testing (Pentest)

Methodologies: Agile, Scrum, Code Review, Test-Driven Development

Education

Binus University Jakarta, Indonesia
Bachelor of Computer Science, GPA: 3.48/4.0 *Aug 2025*

- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Software Design Patterns, Web Programming, Software Engineering, Database Systems, Data Science

Awards & Recognition

DBS Tech Hero 2024 – Most Versatile: Recognized for exceptional technical adaptability and expertise across frontend, backend, and security domains

DBS Silver Titan Certification: Obtained DBS Silver Titan Certification, responsible for reviewing secure code across domains
